

Make the Call for REAL REFORM Today!

Healthcare reform legislation is finally moving forward in Congress. Key decisions about the shape of the final bill are being made right now, and our legislators need to understand that reform must be meaningful and not add any burdens to the middle class in order to be successful.

Please weigh in with our legislators on three key issues for healthcare reform. First, we need a strong public health insurance option. A public option inserts much-needed competition into the healthcare market to drive down costs and provide consumers with an alternative to the private-run plans currently available. Second, employers need to provide healthcare or pay into a system that will help ensure everyone is covered. And, third, we do not want our benefits to be taxed as part of any reform plan. We're already paying too much for healthcare!

Action Instructions:

1 - Dial Toll-Free, 866-203-4960.

2 - Ask for your Senators and Representative.

Note: Make three calls total, one to each Senator and one to your Representative. You can call all three on the same day, or spread the calls out over a couple of days. The important thing is that each person gets the message!

3 - Tell him or her that you are a voter and they need to:

Support healthcare reform that:

- **Has a strong public option,**
- **Ensures employers provide care or pay into a system to ensure everyone can get care, and**
- **Does not tax benefits.**

Please make sure that all results are reported to your District Rapid Response Coordinator.
